

Calculating your peer group volatility for Black-Scholes or other valuation models can be a time-consuming, manual and expensive process. But not anymore!

## Simplify and Automate the Process with PGVTRAX

You are no longer at the mercy of your valuation consultants

- Save time and get volatility with no data imports required
- Save money with one low annual fee
- Maintain an unlimited number of peer groups
- Add an unlimited number of stocks to peer groups
- Run and save reports quickly and easily
- Analyze a stock's volatility history before adding it to a peer group

### Peer Group Volatility On Demand
